MANNEQUIN ASSESSMENT

Now is the time to put all your newfound knowledge to practice. In this assessment you will be asked to demonstrate the following exercises.

1) Preparation/set-up	Take a picture of your station set up (birds eye view).
2) Placing eye-pads	Take a picture of the eye-pads applied to the mannequin.
3) Crystal glass tray	Take a close-up picture of your crystal glass with medical tape on it and with glue drops on the tape (side view).
4) Mapping	Take a close-up picture of both (birds eye view, lash root must be visible).
5) Inner/outer corners	Take a close-up picture of each eye individually (birds eye view, lash roots must be visible).
6) Isolation	Take a picture of one fan attached to the natural lash (lash root must be visible).
7) Premade fan not sticking to the mannequin's eyelid	Take a close-up picture of your mannequin after you have completed eyelash extensions.
8) Correct use of pre-made lash fan	Take a picture of yourself holding pre-made lash fan with your straight tweezers
9) Tweezers	Get someone to take a picture of you holding both the straight tweezers and curved tweezers.
10) Complete look	Take a picture of your mannequin after you have completed all tasks listed above (birds eye view).
